PSD-HUC-049	MRU Barge Campaign Post Shutdown Phase CRA			Due Date: 2021-04-10
Activity	Node	Facility	Priority	
		BRG-CPP		
Project Phase			Guideword	
MRU Integration Project Post-Shutdown Phase				
Causes				
Suitability of habitat for blasting activities Current procedure is to perform blasting activities in Pressurized Habitat				
Safeguards				
None				
Consequences				
Blasting debris / garnet can damage pressurized habitat set-up, e.g. canvas, blocked supply / exhaust fans, etc. Compromised habitat leading to Source of ignition at hazardous classified area on platform during normal operations, leading to increased risks of fire and explosion in event of gas leaks, resulting in personnel injuries / fatalities, major asset and environmental impacts.				
Initial risk		Residual Risk		
None		None		
Recommendations/ Actions				
To confirm habitat type requirement for blasting activities, considering by-product of activity, i.e. blasting debris / garnet. To then update blasting procedure and work pack, including required work area controls for source of ignition.				

Response		
None
